

Flossbach von Storch - Multi Asset - Defensive - RT

INVESTMENT STRATEGY

Flossbach von Storch - Multi Asset - Defensive offers comprehensive integrated investment management for long-term investors. The fund management invests world-wide on the principle of risk diversification in equities, bonds, convertible bonds, currencies, precious metals (indirect) and investment funds. Derivatives may also be used for hedging purposes or for optimising returns; The equity component may only amount to 35 per cent. The fund management uses an in-house developed valuation model when selecting individual stocks. The fund distributes annually to investors. The sub-fund is actively managed. The fund manager determines, regularly reviews and, if necessary, adjusts the composition of the portfolio exclusively in accordance with the criteria specified in the investment policy. The sub-fund is not managed in reference to an index.

EXPLANATORY NOTES REGARDING PERFORMANCE

Gross fund performance (BVI method) takes into account all costs incurred at fund level (for example, management fees), net fund performance also takes into account the subscription fee. Further costs may be charged individually at customer level (e.g. custody fees, commissions and other charges). Example calculation (net method): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5%, € 50 will be deducted from their investment as a one-off initial charge. In addition, custody fees may also be applied, which will further reduce the investor's return. The level of custody fees can be found in your bank's schedule of fees and services.

Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund.

The reference index is merely informative. It does not constitute any obligation from the fund manager to track the index or achieve the same performance.

Past performance is not a reliable indicator of future performance.

² Share class RT of the sub-fund "Flossbach von Storch - Multi Asset - Defensive" was launched on 13.07.2015. The performance data up to 12.07.2015 is a simulated historical performance. It is based on the performance of another Luxembourg sub-fund that had been launched on 23.10.2007 and was merged into this sub-fund effective 1 July 2015. The simulated historical performance takes into account the fee structure of share class RT. Simulated performance is intended purely as an indicator and does not allow any conclusions to be drawn regarding the actual future performance.

MONTHLY COMMENTARY

Global stock markets were relatively mixed in January 2020 following the record year in 2019. While the major US indices continued to climb, their European counterparts recorded a small drop. The Iran crisis at the beginning of the month was quickly forgotten. The outbreak of the coronavirus in China could potentially cause uncertainty for a longer period of time. So far, however, the effects on global growth prospects and, therefore, long-term investment strategies appear to be of little concern. The monetary policy of the major central banks is, and for the moment will remain, far more important. Their meetings at the beginning of year made it clear once again that a more restrictive interest-rate policy should not be expected in the foreseeable future. The yields on good quality bonds fell strongly. The price of the Fund rose in this environment. All of the asset classes made positive contributions to value. The (non-physical) gold position recorded a particularly large increase in value, gaining almost 6 per cent (in euros) in January. We made the following portfolio adjustments during the reporting period. In the equities area, new positions were formed for McDonald's shares and BMW preferred shares. The equity allocation increased by 2.8 percentage points to 28.9%. A hedging position using index puts on the US S&P 500 equity index continues to exist. This, together with the current cash position, should help cushion any correction. In the bond area, new positions were added for medium-maturity euro-denominated bonds from issuers such as EssilorLuxottica, Toyota and CA Immobilien. The bond allocation increased compared to the previous month to 50.8%, while the duration of the Fund was reduced to 4.0 years using interest-rate derivatives. The cash position fell to 9.2% during the course of the month.

Flossbach von Storch - Multi Asset - Defensive - RT

ASSET ALLOCATION AFTER EQUITY HEDGING OVER THE COURSE OF TIME (IN %)*

*The asset allocation until 30.06.2015 corresponds to the historic asset allocation of an acquired Luxembourg sub-fund of the same management company that had been launched on 23.10.2007 and was merged into this sub-fund effective 01.07.2015. "Flossbach von Storch - Multi Asset - Defensive" has essentially the same investment strategy.

Source: Depository and Flossbach von Storch, status: 31.01.20

OPPORTUNITIES

- + Flexible investment policy without benchmarking.
- + Risk is broadly diversified by investing in a range of asset classes (e.g. equities, bonds, convertible bonds and precious metals indirect). Market potential can be exploited by investing across a wide range.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.
- + Derivatives can be used to increase potential yields.
- + Precious metals (indirect) (e.g. in the form of gold) can be used to increase potential yields.

RISKS

- Market risks: The securities in which the Management Company invests the sub-fund assets present opportunities for gain but also the possibility of risk. If a sub-fund invests directly or indirectly in securities and other assets, it is subject to many general trends and tendencies on the markets, which are sometimes attributable to irrational factors, particularly on the securities markets. Losses can occur when the market value of the assets decreases against the cost price. If a unit holder disposes of units in a sub-fund at a time when the quoted price of the sub-fund assets is less than at the time of investment, then the unit holder will not recover the full value of the investment. While each sub-fund constantly strives to achieve growth, growth cannot be guaranteed. The risk exposure of the investor is, however, limited to the sum invested. There is no obligation to make additional capital contributions beyond investors' investments.
- Currency risks: If a sub-fund holds assets which are denominated in foreign currencies, it shall be subject to currency risk. In the event of a devaluation of the foreign currency against the reference currency of the subfund, the value of the assets held in foreign currencies shall fall.
- Credit risks: The fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.
- Interest change risks: Investing in securities at a fixed rate of interest is connected with the possibility that the current interest rate at the time of issuance of a security could change. If the current interest rate increases as against the interest at the time of issue, fixed rate securities will generally decrease in value. Conversely, if the current interest rate falls, fixed rate securities will increase.
- Risks relating to the use of derivatives: The fund may enter into derivative transactions for the purposes listed in the KIID and the sales prospectus. This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the fund.
- Risks of precious metals and commodities: Precious metals and commodities may be subject to greater price fluctuations. Trading prices may also fall.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

CONSERVATIVE:

The fund is appropriate for conservative investors. Due to the composition of the net sub-fund assets, there is a moderate degree of risk but also a moderate degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZONT:

Medium-term: 3 to 5 years

RISK/RETURN PROFILE

Low risk ← → High risk
Potentially low revenue ← → Potentially high revenue

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used for calculating the synthetic indicator is not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. This share class has been placed in the aforementioned risk class because its unit price is subject to little to medium fluctuation, therefore the profit potential and loss exposure may be low to moderate. Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus.
