

Flossbach von Storch - Stiftung - SR

INVESTMENT STRATEGY

Flossbach von Storch - Stiftung offers professional and efficient asset management for charitable foundations; its objective is to generate sustainable returns and preserve the value of the investment. According to the principle of risk diversification, the fund management invests globally in equities, bonds, convertible bonds, currencies, gold (indirectly) and investment funds. Derivatives may be used for hedging purposes or to optimise earnings; up to 35% of the portfolio may be invested in equities. When selecting individual stocks, the fund management uses rating models developed in-house, as well as sustainability criteria. The fund pays a dividend once per year.

EXPLANATORY NOTES REGARDING PERFORMANCE

Gross fund performance (BVI method) takes into account all costs incurred at fund level (for example, management fees), net fund performance also takes into account the subscription fee. Further costs may be charged individually at customer level (e.g. custody fees, commissions and other charges). Example calculation (net method): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5%, €50 will be deducted from their investment as a one-off initial charge. In addition, custody fees may also be applied, which will further reduce the investor's return. The level of custody fees can be found in your bank's schedule of fees and services.

Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund.

The reference index is merely informative. It does not constitute any obligation from the fund manager to track the index or achieve the same performance.

Past performance is not a reliable indicator of future performance.

Further information about ongoing and one-off costs can be found in the key investor information document (KIID), the sales prospectus, and the most recent annual report.

² Share class SR of the sub-fund "Flossbach von Storch - Stiftung" was launched on 10.01.2017. The performance data up to 09.01.2017 is a simulated historical performance. It is based on the performance of another Luxembourg sub-fund that had been launched on 30.10.2007 and was merged into this sub-fund effective 30.12.2016. The simulated historical performance takes into account the fee structure of share class SR. Simulated performance is intended purely as an indicator and does not allow any conclusions to be drawn regarding the actual future performance.

MONTHLY COMMENTARY

October also failed to produce any solutions to the world's geopolitical challenges. The intensity of the trade conflict between the USA and China initially increased – but then subsided again – and the wait for Brexit continues. Global economic indicators are pointing to slower growth. According to official data, Chinese growth was expected to be only six per cent at the end of the period, which would be the lowest rate in around 30 years. The US Federal Reserve (Fed) reduced its key interest rate for the third time in a row to a range of 1.5-1.75 per cent, but signalled it may pause before reducing interest rates again. Equities continued to record gains worldwide. This scarcely benefited European investors, however, as the euro appreciated a good two per cent versus the US dollar in October. In addition, government bond yields increased somewhat again at the end of the period – even though German government bond yields remain deep in negative territory. The Fund recorded a small decrease in value in this environment. All of the asset classes made negative contributions to value. The currency hedges on a portion of the US dollar positions, on the other hand, had a positive effect. In the equity sector, we fully sold our holdings of IBM and Nokia and the index puts (options) on the US S&P 500 equity index in October, while adding a small new position in index puts on the DAX index. The equity allocation decreased by 1.4 percentage points during the month to 24.0 %. In the area of bonds, we subscribed to new issues by ZF Friedrichshafen and the Kreditanstalt für Wiederaufbau (KfW), among others, while selling bonds from issuers such as MSCI and Moeller-Maersk. Although the bond allocation declined by 2.4 percentage points to 43.3 %, the duration of the Fund increased to 4.5 years. In the case of convertible bonds, we increased our holdings of Ctrip. The current positioning of the Fund remains cautious, as also reflected by the increased cash position of 19.2 %.

- » Investment Adviser and Bank Trainee at Bankhaus Delbrück & Co. in Aachen/Cologne (1988–1993)

Flossbach von Storch - Stiftung - SR

ASSET ALLOCATION AFTER EQUITY HEDGING OVER THE COURSE OF TIME (IN %)*

*The asset allocation until 09.01.2017 corresponds to the historic asset allocation of an acquired Luxembourg sub-fund of the same management company that had been launched on 30.10.2007 and was merged into this sub-fund effective 30.12.2016. "Flossbach von Storch - Stiftung" has essentially the same investment strategy.

OPPORTUNITIES

- + Flexible investment policy without benchmarking.
- + Risk is broadly diversified by investing in a range of asset classes (e.g. equities, bonds, convertible bonds and precious metals indirect). Market potential can be exploited by investing across a wide range.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.
- + Derivatives can be used to increase potential yields.
- + Precious metals indirect (e.g. in the form of gold) can be used to increase potential yields.

RISKS

- Market risks: The securities in which the Management Company invests the sub-fund assets present opportunities for gain but also the possibility of risk. If a sub-fund invests directly or indirectly in securities and other assets, it is subject to many general trends and tendencies on the markets, which are sometimes attributable to irrational factors, particularly on the securities markets. Losses can occur when the market value of the assets decreases against the cost price. If a unit holder disposes of units in a sub-fund at a time when the quoted price of the sub-fund assets is less than at the time of investment, then the unit holder will not recover the full value of the investment. While each sub-fund constantly strives to achieve growth, growth cannot be guaranteed. The risk exposure of the investor is, however, limited to the sum invested. There is no obligation to make additional capital contributions beyond investors' investments.
- Currency risks: If a sub-fund holds assets which are denominated in foreign currencies, it shall be subject to currency risk. In the event of a devaluation of the foreign currency against the reference currency of the subfund, the value of the assets held in foreign currencies shall fall.
- Credit risks: The fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.
- Interest change risks: Investing in securities at a fixed rate of interest is connected with the possibility that the current interest rate at the time of issuance of a security could change. If the current interest rate increases as against the interest at the time of issue, fixed rate securities will generally decrease in value. Conversely, if the current interest rate falls, fixed rate securities will increase.
- Risks relating to the use of derivatives: The fund may enter into derivative transactions for the purposes listed in the KIID and the sales prospectus. This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the fund.
- Risks of precious metals and commodities: Precious metals and commodities may be subject to greater price fluctuations. Trading prices may also fall.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

CONSERVATIVE:

The fund is appropriate for conservative investors. Due to the composition of the net sub-fund assets, there is a moderate degree of risk but also a moderate degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZONT:

Medium-term: 3 to 5 years

RISK/RETURN PROFILE

Low risk ← → High risk
Potentially low revenue ← → Potentially high revenue

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used for calculating the synthetic indicator is not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. This share class has been placed in the aforementioned risk class because its unit price is subject to medium fluctuation, therefore the profit potential and loss exposure may be moderate. Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus.
